

Controllers AMICO+

Thanks to the Amico+ controller the new 'three simple steps' fast and efficient controller programming method was created. Insert the irrigation time, for how long and how often and the system programming is complete. This is particularly suitable for irrigating small terraces and balconies.

Technical Features

- Controller type: Tap timer
- Power supply: 2 alkaline batteries 1.5 volts (AA) not included
- Removable control unit
- Backlit screen
- Closing lid
- Low battery signal
- Threaded inlet: 3/4" ABS - 1" F ABS
- Threaded outlet: 3/4" M in ABS
- Maximum number of zones: 2
- Minimum flow rate: 5 l/min
- Maximum flow rate: 40 l/min
- Minimum pressure: 1 bar
- Maximum pressure: 6 bar

Programming Features

- Programming mode: Traditional
- Number of programs: 1
- Start times per program: 1
- Maximum number of starts per day: 4
- Minimum irrigation time per zone: 1 min
- Maximum irrigation time per zone: 240 min
- Irrigation frequency: from every 6 hours to every 15 days
- Manual start: By zone
- Non-volatile memory

	Name	Model
200.4094500	AMICO+	1 WAY
200.4044500	AMICO+ 2	2 WAYS

3 Easy Steps

The special three-step programming feature allows for easy and intuitive programming in less than 60 seconds. The programming logic is based on answering three simple questions: what time of day to water, for how long, and how often.

One Look Display

The 3" backlit display shows you the full irrigation schedule at a glance. It is no longer necessary to navigate through various programming menus to see the irrigation schedule.

Detachable

The removable electronic unit allows for easy programming, battery replacement, and quick solenoid valve maintenance.
